

# General care advice

## **General care advise & what to do in case of accident**

We recommend Leather Master Scandinavia's products for cleaning and protection of leather. These products are mild but at the same time effective and adapted for furniture leather.

### **Aniline**

Leather Soft Cleaner is a gentle cleaning fluid for leather (not suede/nubuck).

Shake the bottle well. Wet the sponge and squeeze out foam. Clean the entire part/cushion with light circular motions out to the nearest seam to avoid water rings when it dries. Do not rub! Dry with a clean cloth. Use 6 to 12 times a year or as needed. In case of any stains, start by dabbing these. Do not rub! Then keep the leather wet out to the nearest seam for approx. 6 hours by spraying water over the leather. This is done in order for stains and unevenness to dissolve and fade out. Allow to dry! Then treat the leather with Leather Protection Cream/Premium to protect against stains, improve wear resistance and keep the leather soft and smooth. Use 2 to 4 times a year or as needed.

**Note! Always test on a small and if possible hidden area for possible colour leakage prior to any treatment.**

### **Standard and semi-aniline leather**

Leather Soft Cleaner is a gentle cleaning fluid for leather (not suede/nubuck). Shake the bottle well. Wet the sponge and squeeze out foam. Clean with light circular motions. Do not rub! Dab any stains. Dry with a clean cloth. Use 4 to 6 times a year or as needed. Then treat the leather with Leather Protection Cream to protect against stains, improve wear resistance and keep the leather soft and smooth. Use 2 to 4 times a year.

**NOTE! Always test on a small and if possible hidden area for possible colour leakage prior to any treatment.**

### **Suede/Nubuck**

Lightly soiled suede/nubuck leather is cleaned with Nubuck Cleaning Sponge & Cloth.

**NOTE! Always do a test on a small and, if possible, concealed surface before treatment.**

Nubuck Cleaner effectively cleans suede and nubuck leather. Vacuum the leather well. Press out some foam on a polyether sponge and clean with light circular motions over the soiled area. Dab the stains in circles from the outside (damp) and towards the stain (wet) or clean the entire cushion out to the nearest seam to avoid water rings when it dries. Allow to dry completely. Use 6 to 12 times a year or as needed. Massage the leather softly using the edge of a saucer. After that, brush suede/nubuck using Nubuck Sponge. Then treat the leather with Leather Natural Protection to protect against stains, improve wear resistance and keep the leather soft and smooth. Use 2 to 4 times a year.

**NOTE! Always test on a small hidden area for possible colour leakage prior to any treatment.**

Lightly soiled suede/nubuck leather is cleaned with Nubuck Cleaning Sponge & Cloth.

**NOTE! Always do a test on a small and, if possible, concealed surface before treatment.**

**NOTE! Grease stains from chocolate, sauce etc. or sweat in the form of dark sections at armrests and/or neck cannot be cleaned as described above. We recommend that you contact your furniture dealer for support & advice before getting started.**
